

Pacia Diaz Awarded Fulbright

Dr. Pacia Diaz, a senior research scientist at the University of Florida, has been awarded a Fulbright Fellowship to study in Spain. Dr. Diaz will be working with researchers at the University of Valencia to study the effects of climate change on water resources in the region. Her research will focus on the impact of climate change on the hydrological cycle and the availability of water for agriculture and urban use. Dr. Diaz is currently a senior research scientist at the University of Florida, where she has been working on the development of integrated water resources management strategies for coastal cities. She has also been involved in several international initiatives, including the Florida Water Supply and Distribution Study and the Florida Water Quality Assessment Study. Dr. Diaz is a member of the American Society of Civil Engineers and the Florida Water Resources Association. She has published several papers on water resources and climate change, and she is currently working on a book about the impact of climate change on water resources. Dr. Diaz is a highly accomplished researcher and a dedicated professional. She is a role model for students and colleagues alike. We are proud to have her as a member of our community and we look forward to her continued contributions to the field of water resources.
